### HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's response to the last Office Action, filed 12/24/2008, has been entered and made of record.
2. Applicant has amended claims 1 and 8. Claims 1-9 are currently pending.
3. Applicants arguments filed 5/20/2009 have been fully considered.
4. Applicant amended claims 1 and 8 to recites "storing on a computer readable medium" in order to overcome the 35 U.S.C. § 101 rejection .

### ***Allowable Subject Matter***

5. Claims 1-9 are allowed.

The following is examiners statement for reason for allowance: Each of independent claims claim 1, 5 and 8 are allowed over the prior art Nippon et al (US 2003/0085907) and JP 2004-046776; because the Examiner found neither prior art cited in the entirety nor based on the prior art, found any motivation to combine any of said prior art which teaches a yarn image creation device for creating a color image of yarn having translucent fluff comprising: capturing means for optically capturing at least twice color input images A, C of the yarn using different background images (G1, G2); storage means for storing the captured color input images; means for solving X and D in the system of equations

Art Unit: 2624

$$A = G1 + (X - G1)D$$

$C = G2 + (X - G2)D$  wherein X is a color image of the yarn itself and D is a yarn opacity image

**means for changing the value of D to 0 for pixels in which the value of D is not greater than a first predetermined value, and to 1 for pixels in which the value of D is not smaller than a second predetermined value, the yarn opacity image D being 1 in pixels where the yarn is totally opaque, and being 0 in pixels where the yarn is totally transparent; and**

storing means for storing the obtained color image X of the yarn itself and the yarn opacity image D as a yarn color image (X,D).

6. The closest prior art is Nippon et al that teaches different background images in figure 2; note that each of the images P1 and P2, assuming that the horizontal number of the pixels is W, the vertical number of the pixels is H, and pixel values of P1 and P2 are  $P1(x, y)$  and  $P2(x, y)$  respectively, the transparency calculation processing part AT obtains the maximum value PPMAX for all pixels. The pixel value may be a RGB value, a brightness value or the like. For the transparency calculation, it is desirable to use a pixel value by which the difference between  $P1(x, y)$  and  $P2(x, y)$  becomes large, column 4, lines 26 and the value  $PT(x, y)$  of a point in the transparency image PT generated by the transparency calculation processing part AT is calculated., wherein 0 indicates transparent, 1 indicates opaque, and the transparency is represented by a real number between 0 and 1. The transparency calculation processing part AT obtains the transparency image PT by calculating the value for each pixel by using the equation. For example, the maximum pixel change PPMAX can be obtained by  $PPB1 - PPB2$ , in which PPB1 is a pixel value of a part where the object is not included in the image P1, and PPB2 is a corresponding pixel value of the part where the object is not included in the image P2. Or,

PPMAX may be the maximum value in  $\text{vertline.P1}(x, y)\text{-P2}(x, y)\text{.vertline.}$  for all pixels; column 5, lines 60-column 6, lines 1-60 ; see figures 1-2.). None of the other prior art stated in the 892-form teaches or suggests any of the equations defined in claims 1, 5 and 8, so that these claims are allowable over the prior art.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional art of record, not discussed hereinabove, were cited in the international search report in the International Application relied upon for priority under 35 U.S.C. § 120, and are thus made of record, but additional copies of these references are not being supplied with this action.
